Perrichon, V. and Fréty, R.
Temperature-programmed reduction: lim-
itation of the technique for determining the
extent of reduction of either pure ceria or
ceria modified by additives 99

Subject Index

- acidity
 Ferrisilicate analogs of ZSM-5 zeolite as catalysts for one-step oxidation of benzene to phenol 33
 Acidity of a microporous amorphous alumina measured by intermittent temperature-programmed desorption of ammonia 61
- active carbon
 Active carbons from semianthracites 115
- alkali promotion
 Complementary study by calorimetry and infrared spectroscopy of alkali metal doped Pd/SiO₂ solids: Adsorption of hydrogen and carbon monoxide 45
- alumina
 Solid-state nuclear magnetic resonance spectroscopic investigation of hydrotreating catalysts and related materials 195
- ammonia
 Acidity of a microporous amorphous alumina measured by intermittent temperature-programmed desorption of ammonia 61
 Vanadia on titania prepared by vapour deposition of vanadyl alkoxide: Influence of preparation variables on structure and activity for the selective catalytic reduction of nitric oxide by ammonia 173
- amorphous alumina
 Acidity of a microporous amorphous alumina measured by intermittent temperature-programmed desorption of ammonia 61
- benzene to phenol oxidation
 Ferrisilicate analogs of ZSM-5 zeolite as catalysts for one-step oxidation of benzene to phenol 33
- calorimetry
 Complementary study by calorimetry and infrared spectroscopy of alkali metal doped Pd/SiO₂ solids: Adsorption of hydrogen and carbon monoxide 45
- carbon monoxide adsorption
 Complementary study by calorimetry and infrared spectroscopy of alkali metal doped Pd/SiO₂ solids: Adsorption of hydrogen and carbon monoxide 45
- catalyst characterization (NMR)
 Solid-state nuclear magnetic resonance studies of the transformation of the zeolite Y catalyst in the course of hydrochlorination of 1-methylcyclohexene by thionyl chloride 71
 Vanadia on titania prepared by vapour deposition of vanadyl alkoxide: Influence of preparation variables on structure and activity for the selective catalytic reduction of nitric oxide by ammonia 173
- catalyst characterization (TPD)
 Temperature-programmed desorption study on supported copper-containing methanol synthesis catalysts 81
- catalyst characterization (XPS)
 Oxidation of toluene over V₂O₅/Nb₂O₅ catalysts 159
- ceria
 Temperature-programmed reduction: limitation of the technique for determining the extent of reduction of either pure ceria or ceria modified by additives 99
- chlorohydrocarbons
 Effects of catalyst composition on dual site zeolite catalysts used in chlorinated hydrocarbon oxidation 139
- chromium
 Effects of catalyst composition on dual site zeolite catalysts used in chlorinated hydrocarbon oxidation 139
- coal oxidation
 Active carbons from semianthracites 115
- cobalt
 Effects of catalyst composition on dual site zeolite catalysts used in chlorinated hydrocarbon oxidation 139
- copper/zinc oxide/alumina
 Temperature-programmed desorption study on supported copper-containing methanol synthesis catalysts 81
- copper/zinc oxide/carbon
 Temperature-programmed desorption study on supported copper-containing methanol synthesis catalysts 81
- copper/zinc oxide/silica
 Temperature-programmed desorption study on supported copper-containing

- methanol synthesis catalysts 81
- dinitrogen monoxide
 - Oxidative hydroxylation using dinitrogen monoxide: a possible route for organic synthesis over zeolites 1
- FeZSM-5 zeolite
 - Ferrisilicate analogs of ZSM-5 zeolite as catalysts for one-step oxidation of benzene to phenol 33
- heat of adsorption
 - Acidity of a microporous amorphous alumina measured by intermittent temperature-programmed desorption of ammonia 61
- hydrogen adsorption
 - Complementary study by calorimetry and infrared spectroscopy of alkali metal doped Pd/SiO₂ solids: Adsorption of hydrogen and carbon monoxide 45
- hydrogen sulphide
 - Catalytic combustion of methane over palladium supported on alumina and silica in presence of hydrogen sulfide 125
- hydrotreating catalysts
 - Solid-state nuclear magnetic resonance spectroscopic investigation of hydrotreating catalysts and related materials 195
- impregnated ceria
 - Temperature-programmed reduction: limitation of the technique for determining the extent of reduction of either pure ceria or ceria modified by additives 99
- infrared spectroscopy
 - Catalytic combustion of methane over palladium supported on alumina and silica in presence of hydrogen sulfide 125
- iron
 - Ferrisilicate analogs of ZSM-5 zeolite as catalysts for one-step oxidation of benzene to phenol 33
- mechanisms
 - Ferrisilicate analogs of ZSM-5 zeolite as catalysts for one-step oxidation of benzene to phenol 33
- methane combustion
 - Catalytic combustion of methane over palladium supported on alumina and silica in presence of hydrogen sulfide 125
- methanol synthesis.
 - Temperature-programmed desorption study on supported copper-containing methanol synthesis catalysts 81
- methylcyclohexene hydrochlorination
 - Solid-state nuclear magnetic resonance studies of the transformation of the zeolite Y catalyst in the course of hydrochlorination of 1-methylcyclohexene by thionyl chloride 71
- niobia
 - Oxidation of toluene over V₂O₅/Nb₂O₅ catalysts 159
- nitric oxide reduction
 - Vanadia on titania prepared by vapour deposition of vanadyl alkoxide: Influence of preparation variables on structure and activity for the selective catalytic reduction of nitric oxide by ammonia 173
- nitrous oxide as oxidant
 - Ferrisilicate analogs of ZSM-5 zeolite as catalysts for one-step oxidation of benzene to phenol 33
- nuclear magnetic resonance
 - Solid-state nuclear magnetic resonance studies of the transformation of the zeolite Y catalyst in the course of hydrochlorination of 1-methylcyclohexene by thionyl chloride 71
 - Solid-state nuclear magnetic resonance spectroscopic investigation of hydrotreating catalysts and related materials 195
- oxidation
 - Effects of catalyst composition on dual site zeolite catalysts used in chlorinated hydrocarbon oxidation 139
- oxidative hydroxylation
 - Oxidative hydroxylation using dinitrogen monoxide: a possible route for organic synthesis over zeolites 1
- palladium/ γ -alumina
 - Pyridine synthesis from tetrahydrofurfuryl alcohol over a Pd/ γ -Al₂O₃ catalyst II. Effect of supports and palladium loading 21
 - Catalytic combustion of methane over palladium supported on alumina and silica in presence of hydrogen sulfide 125
- palladium/silica
 - Catalytic combustion of methane over palladium supported on alumina and silica in presence of hydrogen sulfide 125
- palladium
 - Complementary study by calorimetry and

- infrared spectroscopy of alkali metal doped Pd/SiO₂ solids: Adsorption of hydrogen and carbon monoxide 45
- particle size
- Pyridine synthesis from tetrahydrofurfuryl alcohol over a Pd/ γ -Al₂O₃ catalyst II. Effect of supports and palladium loading 21
- phenol
- Ferrisilicate analogs of ZSM-5 zeolite as catalysts for one-step oxidation of benzene to phenol 33
- phenol synthesis
- Oxidative hydroxylation using dinitrogen monoxide: a possible route for organic synthesis over zeolites 1
- pyridine synthesis
- Pyridine synthesis from tetrahydrofurfuryl alcohol over a Pd/ γ -Al₂O₃ catalyst II. Effect of supports and palladium loading 21
- Raman
- Vanadia on titania prepared by vapour deposition of vanadyl alkoxide: Influence of preparation variables on structure and activity for the selective catalytic reduction of nitric oxide by ammonia 173
- reaction mechanism
- Solid-state nuclear magnetic resonance studies of the transformation of the zeolite Y catalyst in the course of hydrochlorination of 1-methylcyclohexene by thionyl chloride 71
- regeneration
- Catalytic combustion of methane over palladium supported on alumina and silica in presence of hydrogen sulfide 125
- selective oxidation
- Oxidative hydroxylation using dinitrogen monoxide: a possible route for organic synthesis over zeolites 1
- selectivity (benzaldehyde)
- Oxidation of toluene over V₂O₅/Nb₂O₅ catalysts 159
- silica-supported palladium
- Complementary study by calorimetry and infrared spectroscopy of alkali metal doped Pd/SiO₂ solids: Adsorption of hydrogen and carbon monoxide 45
- sulphur poisoning
- Catalytic combustion of methane over palladium supported on alumina and silica in presence of hydrogen sulfide 125
- support (niobia)
- Oxidation of toluene over V₂O₅/Nb₂O₅ catalysts 159
- supports
- Pyridine synthesis from tetrahydrofurfuryl alcohol over a Pd/ γ -Al₂O₃ catalyst II. Effect of supports and palladium loading 21
- temperature-programmed desorption
- Acidity of a microporous amorphous alumina measured by intermittent temperature-programmed desorption of ammonia 61
- temperature-programmed oxidation
- Temperature-programmed reduction: limitation of the technique for determining the extent of reduction of either pure ceria or ceria modified by additives 99
- temperature-programmed reduction
- Temperature-programmed reduction: limitation of the technique for determining the extent of reduction of either pure ceria or ceria modified by additives 99
- tetrahydrofurfuryl alcohol
- Pyridine synthesis from tetrahydrofurfuryl alcohol over a Pd/ γ -Al₂O₃ catalyst II. Effect of supports and palladium loading 21
- textural properties
- Active carbons from semianthracites 115
- thionyl chloride
- Solid-state nuclear magnetic resonance studies of the transformation of the zeolite Y catalyst in the course of hydrochlorination of 1-methylcyclohexene by thionyl chloride 71
- toluene oxidation
- Oxidation of toluene over V₂O₅/Nb₂O₅ catalysts 159
- TPR)
- Vanadia on titania prepared by vapour deposition of vanadyl alkoxide: Influence of preparation variables on structure and activity for the selective catalytic reduction of nitric oxide by ammonia 173
- vanadia
- Oxidation of toluene over V₂O₅/Nb₂O₅ catalysts 159
- vanadia/titania

- Vanadia on titania prepared by vapour deposition of vanadyl alkoxide: Influence of preparation variables on structure and activity for the selective catalytic reduction of nitric oxide by ammonia 173
- vapour deposition
- Vanadia on titania prepared by vapour deposition of vanadyl alkoxide: Influence of preparation variables on structure and activity for the selective catalytic reduction of nitric oxide by ammonia 173
- XRD)
- Solid-state nuclear magnetic resonance studies of the transformation of the zeolite Y catalyst in the course of hydrochlorination of 1-methylcyclohexene by thionyl chloride 71
- Y-type zeolite
- Effects of catalyst composition on dual site zeolite catalysts used in chlorinated hydrocarbon oxidation 139
- zeolites
- Oxidative hydroxylation using dinitrogen monoxide: a possible route for organic synthesis over zeolites 1
- Ferrisilicate analogs of ZSM-5 zeolite as catalysts for one-step oxidation of benzene to phenol 33
- Solid-state nuclear magnetic resonance studies of the transformation of the zeolite Y catalyst in the course of hydrochlorination of 1-methylcyclohexene by thionyl chloride 71
- Effects of catalyst composition on dual site zeolite catalysts used in chlorinated hydrocarbon oxidation 139
- zeolite Y
- Solid-state nuclear magnetic resonance studies of the transformation of the zeolite Y catalyst in the course of hydrochlorination of 1-methylcyclohexene by thionyl chloride 71
- ZSM-5
- Oxidative hydroxylation using dinitrogen monoxide: a possible route for organic synthesis over zeolites 1
